12. Adar..... { February. { March.	6.—12. Elul..... { August. { September.
13. Ve-Adar or Second Adar.	

The Jews reckoned their months according to the moon: and every third year they added a month, which they called Ve-Adar, in the same way as we add a day in every fourth or leap year.

They began their civil year in the month Tizri, or September, according to which they computed and settled all temporal affairs. But after coming out of Egypt they began their ecclesiastical year in the month of Nisan, or March, from which they computed all their great festivals.

Their day was twofold: the *natural*, consisting of twenty-four hours, which commenced at sunset; and the *artificial*, beginning at sunrising and ending at sunset, which was divided into twelve equal parts or hours. See John xi. 9.

Their night was divided into four parts or watches, each consisting of three hours. The first began at sunset; the second at nine o'clock; the third at midnight; the fourth at three in the morning, and continued

until sunrise. These were sometimes otherwise expressed; viz., *even*, *midnight*, *cock-crowing*, and the *dawn*. See Mark xiii. 35.

Their artificial day was divided into four equal parts. The first began at sunrise, and continued until nine o'clock; the second began at nine, and continued till noon; the third began at noon, and ended at three in the afternoon (which is sometimes termed the ninth hour); the fourth began at three, and continued till sunset.

Our Saviour was seized in the garden some time after midnight, or during the third watch. Then He was hurried first to the palace of Caiaphas, where Peter denied Him. Afterwards the rest of the priests, scribes, and the whole council began to assemble in the dawn, or before sunrising. Their examination of Him, and bringing Him before Pilate, lasted till nine o'clock. From thence to noon they were employed in preparing for His execution, and conducting Him to Calvary. He was affixed on the cross at noon, which is sometimes termed the sixth hour. He continued on it in agony until three in the afternoon, at which time precisely He expired. This was the hour when the paschal lamb which typified Him used to be slain.

A TABLE OF MEASURES.

- A Cubit, somewhat more than one foot nine inches English.
- A Span, half a cubit, or nearly eleven inches.
- A Hand-breadth, sixth part of a cubit, or a little more than three inches and a half.
- A Fathom, four cubits, about seven feet three inches and a half.
- A Measuring Reed, six cubits and a hand-breadth, or nearly eleven feet. This was used in measuring buildings.
- A Measuring Line, fourscore cubits, about one hundred and forty-five feet eleven inches. This was used to measure grounds; hence *the lines* (Psa. xvi. 6) are taken figuratively for the inheritance itself.
- A Stadium or Furlong, nearly 146 paces.
- A Sabbath day's Journey, about 729 paces.
- An Eastern Mile, one mile and 403 paces, English measure.
- A Day's Journey, upwards of thirty-three miles and a half.

Note.—A pace is equal to five feet.

There were different kinds of cubits. The common cubit, called the cubit of a man (Deut. iii. 11), was about eighteen inches. The king's cubit was three inches longer than the common one. The holy cubit was a yard, or two common ones.

A TABLE OF WEIGHTS.

- A Shekel, near half an ounce, Troy weight.
- A Maneh, was sixty shekels, about two pounds and a quarter.
- A Talent, three thousand shekels, or 113 pounds, and upwards, of ten ounces.

A TABLE OF MONEY.

	£	s.	d.
A Shekel of Gold, worth about	1	16	5½
A Golden Daric, about	1	1	10
A Talent of Gold, about	5,464	5	8
A Shekel of Silver, about	0	2	3½
A Bekah, half a shekel, about	0	1	2
A Gerah, twentieth part of a shekel, about	0	0	1½
A Maneh or Mina, fifty shekels	5	13	10
A Talent of Silver, 3,000 shekels, about	341	10	5
A Silver Drachma, about	0	0	7¼
Tribute Money, two drachms	0	1	3½
A Piece of Silver (<i>Stater</i>)	0	2	7
A Pound (<i>Mornai</i>), 100 drachms	3	4	7
A Roman Penny (<i>Denarius</i>)	0	0	7¼
A Farthing (<i>Assarium</i>), about	0	0	1½
Another Farthing (<i>Quadrans</i>), half the former.			
A Mite, the half of this latter.			

Note.—Silver is here reckoned at five shillings per ounce, and gold at four pounds per ounce.

MEASURES OF LIQUIDS.

The Cor, or Chomer, seventy-five gallons and somewhat above five pints.

The Bath, the tenth of the chomer, or seven gallons four pints and a half.

The Hin, sixtieth of a chomer, about a gallon and a quart.

The Log, about three-fourths of a pint.

The Firkin (*Metretes*), somewhat more than seven pints.

MEASURES OF DRY THINGS.

The Cab, somewhat above two pints.

The Omer, above five pints.

The Seah, one peck and about half a pint.

The Ephah, three pecks and about three pints.

The Letech, about four bushels.

The Homer, about eight bushels.

The Choenix (mentioned Rev. vi. 6) was the daily allowance to maintain a slave. It contained about a quart, some say only a pint and a half. When this measure was sold for a denarius, or Roman penny, corn must have been above twenty shillings an English bushel, which indicates a scarcity next to a famine.

N.B.—In the above tables of coins and measures the fractional parts are omitted, as exactness in this point would be of little use to the common English reader

Sunday School Union.

EDUCATIONAL WORKS

FOR

TEACHERS AND BIBLE STUDENTS.
